**TO WHOMSOEVER IT MAY CONCERN**

*This is to confirm that M/s Forms and Surfaces have been working at 635 MLD Water Treatment Plant site at Sonia Vihar for the last one (1) year. They were working in the capacity of the water proofing agency associated with M/s Simplex Concrete Piles (India) Limited, the civil subcontractors to ONDEO Degrémont Limited.*

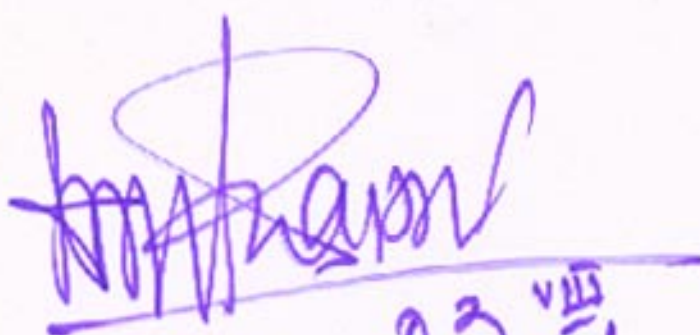

*M/s Forms and Surfaces have been primarily responsible for the successful completion of hydrotesting of over 30 Nos. reservoirs including pulsators, filters, presettlers and clear water reservoirs. The individual capacity of each of the above said reservoirs is in excess of over 5 Million litres. The injection grouting methodology adopted by the agency for arresting the leakages from the positive and the negative water faces is foolproof and commendable.*

*M/s Forms and Surfaces have at their command a group of skilful and dedicated workforce who have performed to the best of their capability and at times, beyond the call of duty. The professional approach of the organisation in executing the work at hand, the sensitivity towards understanding the problem and then finding the suitable solution, the commitment towards time targets and above all the sincerity towards the work at hand was observed and appreciated by one and all at site.*

*We wish the organisation and its team the very best in future and recommend strongly M/s Forms and Surfaces for such works for all clients. We ourselves look forward to a long working relationship with M/s Forms and Surfaces in the future that follows.*
